Article 32: TRANSPORTATION

A. Fatigue Mitigation Transportation
   In the event a Resident is too fatigued to drive home safely at the end of a shift, or is called into the worksite when assigned to home call less than with eight (8) hours from leaving their last shift, the Resident has the following options:

   a. Sleep in an available call room until able to drive safely; or

   b. Utilize a transportation service (app-based) to and/or from the hospital to and/or from their verifiable home address.

B. Procedure

   1. The University will provide access to an app-based rideshare service for use in the event the Resident is too fatigued to safely drive at the end of a shift. This option is available for use from any training site to a verifiable home address and return to retrieve their vehicle. Fees are billed and paid through the Department. Tips are not included.

   2. If the Resident is assigned to a different location on the next work day, the Resident can use the app-based rideshare service to the work location and then from the work location to retrieve their vehicle. In the event that this occurs more than once per calendar month, prior approval is required from the Program Director.

   3. When a Resident is reassigned and travels to a different location during a shift, the University will provide travel reimbursement in accordance with the UCLA travel policy. Westwood and Santa Monica locations are considered to be one worksite.
