

November 2005

Dear University of California Member,

We have reviewed your eligibility information and noted that we do not have your Medicare Health Insurance Benefit Number (HIBN) number. We are in the process of implementing the Medicare Part D Prescription Drug benefit and need this information in order to enroll you in this plan.

Did you also know that if you provide your HIBN number you can avoid mailing the Medicare Explanation of Benefits (EOBs) to Blue Cross to have Blue Cross benefits paid? Blue Cross' Medicare Crossover program allows your claims to be filed directly from Medicare.

We can enroll you in the new Medicare Part D Prescription Drug plan and process your Blue Cross medical benefits through Medicare Crossover if you complete and return the enclosed postcard (already addressed and with postage paid) which requires:

- Medicare Health Insurance Benefit Number (HIBN)
- Effective date of Medicare Part A & B
- UC Subscriber ID# from your Blue Cross membership card
- Your signature

Please return this postcard immediately so there will be no disruption in your prescription drug benefits.

We look forward to hearing from you.

Sincerely,

Blue Cross of California
